

"We were extremely pleased with the social worker that was assigned to our facility when one of our staff was on maternity leave. This person came with a wealth of experience and was quickly able to manage the caseload. There was a strong confidence about her, but she never hesitated to ask questions so that her work would meet our expectations. We will definitely use Social Work p.r.n. in the near future . . . when our next baby is due to arrive."-----Manager of a Long Term Care Facility
